\hline \& \& Content Descriptor \& Elaborations \& Content Descriptor \& Elaborations \& Content Descriptor \& Elabor \& Content Descript \& Elaboratio \\
\hline Level 3 \& \begin{tabular}{l}
Sourced from Level descriptions: \\
'At this level: \\
Understanding includes connecting number representations with number sequences, partitioning and combining numbers flexibly, representing unit fractions...,' \\
Fluency includes recalling multiplication facts..., \\
Problem Solving includes... using number properties to continue number patterns \\
Reasoning includes using generalising from number properties and results of calculations...,'
\end{tabular} \&  \& \begin{tabular}{l}
* Identifying even numbers using skip counting by twos or by grouping even collections of objects in twos \\
* Explaining why all numbers that end in the digits 0 , \\
2, 4, 6 and 8 are even and that numbers ending in 1 , \\
3, 5, 7 and 9 are odd \\
Placing four-digit numbers on a number line using \\
an appropriate scale \\
* Reproducing numbers in words using their numerical representations and vice versa \\
* Recognising that 10000 equals 10 thousands, 100 hundreds, 1000 tens and 10000 ones \\
* Justifying choices about partitioning and regrouping numbers in terms of their usefulness for particular
calculations calculations \\
* Demonstrating the connection between addition and subtraction using partitioning or by writing equivalent number sentences \\
* Recognising that certain single-digit number combinations always result in the same answer fo addition and subtraction, and using this knowledge for addition and subtraction of larger numbers \\
* Combining knowledge of addition and subtraction facts and partitioning to aid computation (for example \(57+19=57+20-1\) ) * Establishing multiplication facts using number sequences \\
* Writing simple word problems in numerical form and vice versa \\
* Using a calculator to check the solution and reasonableness of the answer
\end{tabular} \& \begin{tabular}{l}
Model and represent unit fractions including \(1 / 2,1 / 4,1 / 3,1 / 5\) and their multiples to a complete whole \\
(ACMNA058)

 \& 

* Partitioning areas, lengths and collections to create halves, thirds, quarters and fifths, such as folding the fractions and comparing the number of parts with their sizes \\
* Locating unit fractions on a number line \\
* Recognising that in English the term 'one third' is used (order: numerator, denominator) but that in other languages this concept may be expressed as three parts, one of them' (order: denominator numerator) for example Japanese
\end{tabular} \&  \&  \& Describe, continue, and create number

patems resulting from pertorming addition
or subtraction

(ACMNA060) \& $|$| *Identifting and writing the rules for |
| :--- |
| number patterns |
| $*$ © Describing a rule for a aumber |
| pattern, then creating the pattern | \\

\hline Level 3
Achievement Standard \& NOTE: The standards are not divided into sub-strands in the logic would dictate that the standards could be put into sub-
strands, as demonstrated to the right. \&  \& \& Students model and represent unit
fractions for halves, thirds, quarters, fiths
and eights, and multiples of these up to one. \& \& They represent money values in
various ways and correctly count out
change from financial transactions. \& \& \& \\
\hline
\end{tabular}
